Increasing traffic, access to the worksite, new employee recruitment, valued employee retention – these are all issues that impact businesses in our region.

The Middlesex 3 Coalition is public-private partnership that was created to help address business concerns – such as traffic and access to transportation resources, including carpools, vanpools, shuttles, emergency ride home programs, Lyft, last mile connects and transit programs.

The Middlesex 3 Coalition focuses on the best ways to get your employees to work.
